The research focuses on the analysis of changes in urban planning that occurred in the urban area of Campos dos Goytacazes (Distrito Sede) during the review of the master plan.: The purpose of this study is to verify whether the changes that occurred during the review are in the public interest. For the development of this research, the following methodological processes are important: research and bibliographic review; collection of documentary data (laws, maps, satellite images); data analysis using Google Earth Pro; comparison of urban guidelines in the two master plans, using laws and maps; elaboration of article. It is expected to provide master plan evaluation information in a review process, contributing to the urban planning and management process. The research will be presented in the form of a scientific article for submission in a Research Journal.

Keywords: Urban planning. City plan review. Land use law.
